Established in 2023, the Software Technology program is supported by a faculty team of 15 members, including 1 professor, 5 associate professors, 3 lecturers, 7 teaching assistants, and 2 industry part-time instructors. As the core program of the college-level high-standard Software Technology cluster, it is equipped with extensive training facilities: 5 fundamental training labs, 1 digital innovation workshop, 1 HarmonyOS lab, 1 software studio, 6 information innovation training centers, 4 production-oriented training bases, and 1 college-level skill

master studio.

The program maintains deep collaboration with leading enterprises such as Huawei and 360, jointly establishing a digital security operations center. It has been accredited as a Huawei ICT Academy and an H3C ICT Academy, providing training to over 2,000 individuals annually.

Guided by a progressive talent development model focused on “professional awareness, job competence, and core competitiveness,” the program stays at the forefront of software technology and integrates artificial intelligence technology into the curriculum system. Meanwhile it hones students’ practical abilities and stimulates their creativity through project and competition-driven approaches as well as participation in teachers’ research projects.

In 2024, students made their debut in the Shandong Province Vocational Students Skills Competition winning one second prize. We have received more than 90 awards in national and provincial contests as well. The year 2025 saw further breakthroughs in high-level competitions, with 10 national awards in the China Collegiate Computing Design Competition and the 16th “Lanqiao Cup” National Software & IT Talent Competition, plus one provincial award in the 19th CCB “Challenge Cup” Shandong College Students Academic & Scientific Works Contest. These outstanding results fully demonstrate the program’s education quality and the comprehensive capabilities of its students..
